

**Amendments to the Specification:**

Please replace the paragraph beginning on page 13, line 5 with the following amended paragraph:

The finger elements 164, 166, 168, and 170 of the fixed seat 162 dictate the vertical and lateral position of the cassette 50, while carriage is held against posts 182. Posts 182 are the defining features for the inward/outward location of the cassette 50. The lips 88 of the main carriage 78 contact the posts 182 and the rim 72 of the cassette 50 simultaneously, controlling their registration. The rim 72 and posts 182 are both in contact with the same surface of the carriage ~~50~~78, and therefore are coincident with each other.
